

Product Overview

Accelerator™ PLUS is the first product developed specifically to reduce the crust that can accumulate in manure storage facilities and is an important part of any cleaning and disinfecting program.

How It Works

Accelerator™ PLUS contains enzymes selected for their ability to digest the pericarp (outer layer) of the corn kernel and other hard to digest feed components, thereby limiting the formation of the pit crust on stored manure.

Methods of Application

- Gilmore Hose Applicator
- In-Line Hose Proportioner

When to Use Accelerator™ Plus

Prior to washing your facility or on an as-needed basis.

Product Claims

Accelerator™ PLUS reduces pit crust. A reduction in pit crust alters the environment in which flies can lay their eggs, rodents build nests and effects ammonia emissions in buildings.

Benefits of Accelerator™ Plus

- Inexpensive
- Easy to use
- Proven technology
- Technically supported

Benefits of Decreasing Pit Crust

- Reduces fly populations levels
- Reduces rodent populations
- Reduces fly spray usage
- Improves pig growing environment
- Reduces ammonia levels
- Reduces building maintenance cost
- Reduces rodent bait usage
- Improves worker environment
